

Rochester is pleased to offer a dynamic program to provide long-term supply and support for discontinued semiconductors. For many markets, including Telecom, Military, Aerospace, Medical, Industrial, program life can extend for decades.

The need for a reliable and trustworthy solution is critical.

Rochester LTS [Long Term Supply] Program

As devices are discontinued by the original Supplier, Customers are faced with many difficult decisions:

- ∴ What are the projected quantities needed and for how long?
- ∴ Is there an alternate device that can be substituted?
- ∴ Can you be assured that an alternate will be available long term?
- ∴ What are the costs and time involved in board redesign?
- ∴ Is there enough funding to support purchasing for projected demand?
- ∴ By purchasing End Of Life [EOL] inventory, can your company handle the necessary handling, storage, precautions, systems and logistics required?
- ∴ If an EOL purchase is not done, how can you be assured that you can procure reliable product when needed?

The Rochester Program

Each LTS program is designed to meet each Customer's requirements. A detailed proposal is submitted for each obsolete device. Proposals will be based on the following information:

- ∴ Original part number and manufacturer?
- ∴ Any acceptable alternate parts?
- ∴ When devices were last purchased were they bought direct from the original manufacturer or through an authorized Distributor?
- ∴ Last quantity purchased and price paid?
- ∴ Projected annual quantities required, number of years of support needed and anticipated delivery schedule?
- ∴ Any special conditions, specifications, instructions, quality provisions required?
- ∴ Any specific budget constraints?

The Rochester Solution

With over 23 years of dedicated experience, Rochester is the world's premier aftermarket supplier of discontinued semiconductors. No other company is contractually authorized by 30 plus original Suppliers, including AMD, Analog Devices, Altera, Cypress, Fairchild, Freescale, Intel, Intersil, National and Texas Instruments.

- ∴ Over 500 million devices in stock.
- ∴ Over 5 billion die in stock.
- ∴ All inventory 100% factory direct and completely traceable.
- ∴ Secure and bonded storage of finished devices and die.
- ∴ Stringent inventory and system controls.
- ∴ Dedicated LTS program management.
- ∴ Same day shipment to multiple Customer locations worldwide.
- ∴ In-house testing and value added services available.
